PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in building CI/CD pipelines, containerized deployments, and cloud infrastructure automation across Amazon Web Services and Microsoft Azure. Experienced in implementing Infrastructure as Code using Terraform, orchestrating containerized workloads with Kubernetes, and automating deployments via Jenkins and GitHub Actions. Passionate about improving deployment reliability, scalability, and system performance through automation and modern DevOps practices.

WORK EXPERIENCE:

Systems Limited | DevOps Intern (Aug 2025 – Nov 2025)

- Designed and maintained CI/CD pipelines using AWS DevOps.
- Containerized applications using Docker and deployed to Kubernetes clusters.
- Automated AWS infrastructure provisioning using Terraform modules.

Pointerz | Remote DevOps Intern (Feb 2025 – May 2025)

- Built GitHub Actions CI/CD pipelines for automated build and deployment.
- Managed Dockerized applications and supported Kubernetes-based scaling.
- Deployed cloud infrastructure on Azure including Azure Virtual Machine.

PROJECTS

Create S3 Bucket Using Terraform & Deploy Static Website

- Provisioned and configured an S3 bucket using Terraform on AWS.
- Implemented modular and reusable Terraform configurations.
- Deployed static website with proper access control.

Two-Tier Application Deployment

- Containerized Flask app and MySQL using Docker Compose.
- Designed Jenkins CI/CD pipeline for automated build and deployment.
- Deployed application on AWS EC2.

CI/CD Pipeline (GitHub Actions)

- Developed Node.js application and deployed on AWS EC2
- Implemented automated CI/CD pipeline triggered on push.
- Configured PM2 for process management.

Three-Tier Web App with Kubernetes

- Provisioned and managed EKS cluster for frontend, backend, and database.
- Configured Kubernetes Deployments, Services, and ALB Ingress

- Implemented auto-scaling and high availability

CORE COMPETENCIES

- CI/CD: Jenkins, GitHub Actions
- Containers & Orchestration: Docker, Kubernetes
- Infrastructure as Code: Terraform, Ansible
- Cloud Platforms: AWS, Azure
- Monitoring & Logging: Prometheus, Grafana
- Version Control: Git, GitHub
- Programming: Bash, Python

EDUCATION

- Bachelor in Computer Science (BSCS) – Virtual University (In Progress)
- Bachelor's in Management Science (BBA) – Bahria University Karachi Campus

CERTIFICATIONS

- PIAIC – Specialization in Cloud Native Computing
- KodeKloud – AWS Cloud Practitioner
- KodeKloud – Microsoft Azure Fundamentals (AZ-900)
- KodeKloud – Kubernetes for Beginners
- KodeKloud – Shell Script for Beginners
- Credly – AWS Certification Badge
